# Sedation & General Anaesthesia Mapping User Guide

The Sedation & General Anaesthesia Mapping page displays all accredited deep sedation and general anaesthesia facilities in British Columbia. You can locate facilities by scrolling through the map or by using the results list found below the map. Clicking on a facility in the list or on the map will automatically re-center the map to highlight the selected location.

It is recommended to use up-to-date modern browsers for the best experience, such as Google Chrome or Microsoft Edge.
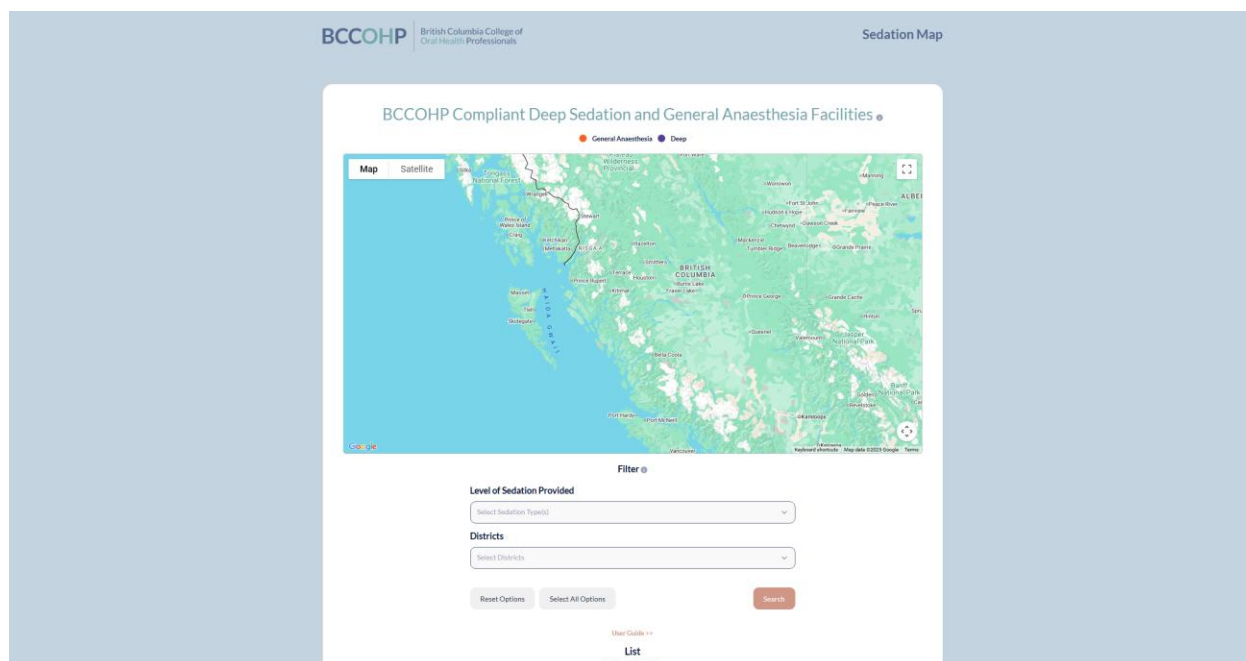

Begin Searching

Use "Level of Sedation Provided" and/or "District" filters to search for facilities. You can select multiple options within each filter. Alternatively, click "Select All Options" button to view all facilities at once. To clear all selections, use the "Reset Options" button. However, it is important to note that using "Select All Options" or "Reset Options" buttons will not initiate a search. You must click the coral-colored "Search" button to search based on the selected options.

When the page loads, the "Filters" section is empty.

- Clicking "Select All Options" will automatically select all choices under both "Level of Sedation Provided" and "Districts." Clicking "Reset Options" will clear all selections under these categories.

- Clicking the small "x" to the left of a label will remove that specific filter. To remove all filters in a row, click the "x" icon located at the far right of the filter box.

Level of Sedation Provided

| ⊗Deep ⊗General Anaesthesia | ⊗ ⌄ |

Districts

| ⊗Fraser Valley ⊗North ⊗Southern Interior ⊗Vancouver ⊗Vancouver Island | × ⌄ |

- Clicking "Search" will apply the selected options and display facilities based on the choices made under "Level of Sedation Provided" and "Districts".

Facility Information and Navigation

Clicking on a marker on the map will open an information popup displaying additional details about the facility. Within this popup, you can also open a new page that redirects to the location on Google Maps, allowing for quick navigation to the facility:
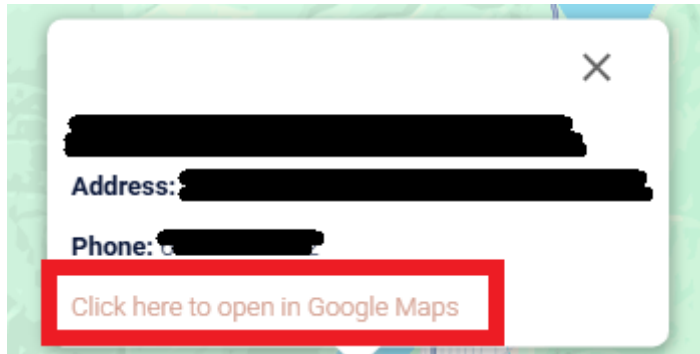

Example Usage (Step by Step):

1) Select search filters (e.g., general anaesthesia facilities in Vancouver).

2) After selecting the desired filters, click "Search" button to view the results.

3) Clicking on a facility in the list or on a marker on the map will highlight that location by displaying a white popup with summary information.

4) Select "Click here to open in Google Maps", this will redirect you to Google Maps where you can search for directions for the highlighted facility.
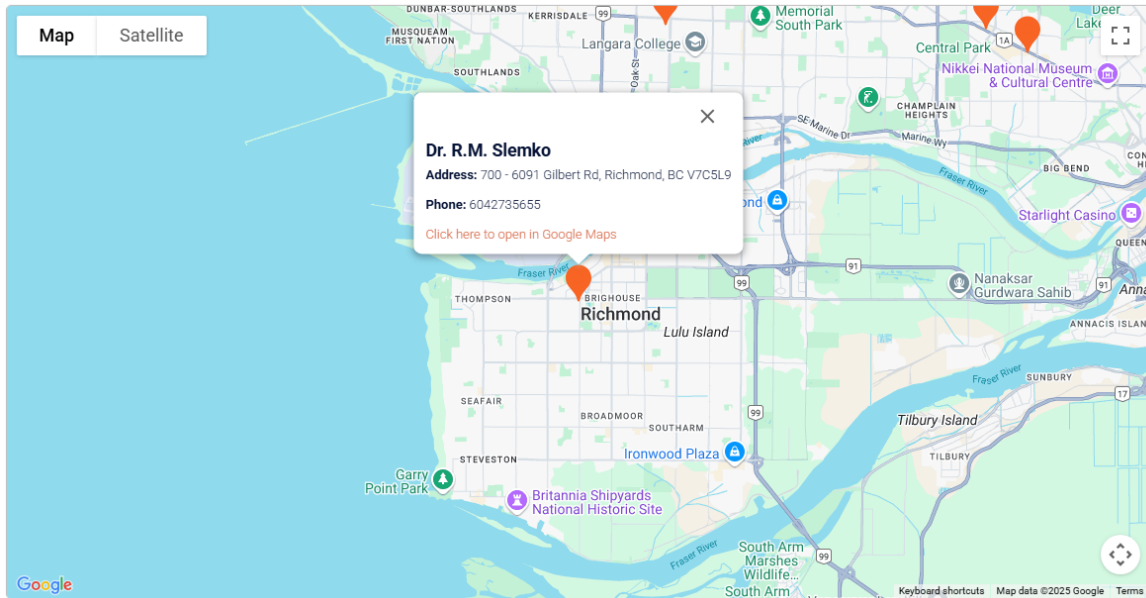

5) Click on "Directions" and either share your location with Google or enter your starting point to view directions to the facility.
